

Checklists

Below are the checklists that illustrate the steps the Planning Board generally takes in processing applications for minor subdivisions, boundary line adjustments, site plans and special use permits. The checklists show a typical flow of actions on an application. The Board may choose to proceed in a different order and may be empowered to eliminate or add additional steps, and the checklists reproduced here are merely provided for informational purposes.

The applicant is urged to review the relevant provisions of the Town Code (accessible through this website) to learn the specific requirements and standards for the type of application in question.
